Property Description

The Seascape home was designed by Costa Rican Architects, Studio Anónima, to soak in the spectacular tropical dry forest tree tops and Southern Ocean views. The home was custom designed to bring the natural, expansive Southern views of Homesite 18-F into the living areas as the indoor and outdoor spaces unite. The signature open-plan design with premium finishes are a hallmark of the Seascape home. Natural Modern elements are featured throughout... with thoughtful touches at every turn. The chef's kitchen serves as a centerpiece to the home with social areas spilling out to the living/dining areas and adjacent outdoor spaces beyond — perfect for entertaining. The infinity pool is the jewel of the home with LED lighting, jetted seating and social areas embedded! Poolside BBQ and outdoor kitchen are perfect for both large scale entertaining or more intimate gatherings. The well appointed master suite was designed to allow the “outdoors in” via floor to ceiling windows not only to the ocean views but also to the adjacent “hanging garden”! Guest suites are of ample size and allow for friends, family and guests to comfortably coexist in harmony.
